

ALPHA

CHAIR STAIRLIFT

ESTABLISHED WORLDWIDE

High-quality lift systems for more than 30 years

DEAR CUSTOMERS!

Lehner Lifttechnik - Welcome to a world of barrier-free mobility.
All our daily efforts are aimed at enabling the users of our products to lead a barrier-free life.

Since my father founded the company in Austria over 30 years ago, our team has been working to make everyday life easier for people with limited mobility with our reliable lifts.

We stand for affordable and at the same time high-quality lift systems. We always aim to offer our customers outstanding products at attractive prices. As a full-range supplier, our portfolio offers 13 lift solutions for a wide variety of situations. In addition to chair stairlifts and platform stairlifts, this also includes vertical platformlifts.

Thanks to the use of high-quality components and robust designs, our products impress with their durability and trouble-free operation. Manufacturing to the highest European standards and sophisticated safety equipment ensure reliable use for years to come.

We are proud to be able to give people back a bit of independence with our lifting solutions.

ALPHA

Chair stairlift for curved stairs

RELIABLE AND UNIVERSAL

This describes how much effort and care we have put into every single function of the Alpha chair stairlift. From high-quality components and aesthetic design to user-friendly operation - the Alpha, a reliable solution for mobility needs.

All functions are designed to enable users to climb stairs as easily, comfortably and safely as possible. Regardless of the structural requirements, the Alpha impresses with its wide range of applications and solid performance.

“

WE ARE PROUD THAT OUR LIFT SYSTEMS HELP PEOPLE ALL
OVER THE WORLD TO LIVE A BARRIER-FREE LIFE EVERY DAY.

“

Max Lehner, Company founder

4 REASONS

To choose the Alpha chair stairlift

SPACE-SAVING

When parked, the seat- and footrest can be folded upwards to minimise the space required. An automatic footrest is available as an option.

ERGONOMIC

Comfortably shaped backrest and additional options such as Ergo-Joystick and EasyFlex seat board make travelling with the Alpha a pleasant experience.

COMFORTABLE

The swivel seat (manual or automatic) makes it easy to get on and off the lift. The Alpha is operated intuitively using a joystick or radio remote control.

SAFE

Robust materials, production to the highest European standards and reliable safety features guarantee safe use for many years.

DOUBLE RAIL SYSTEM

Wide range of options for different types of stairs

FIXING OPTIONS

Pillars screwed to the stairs (standard)

Pillars fixed to the stairs with clamps

Pillars fixed to the string of the stairs

Mounting directly to the wall

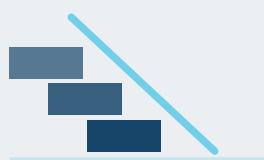

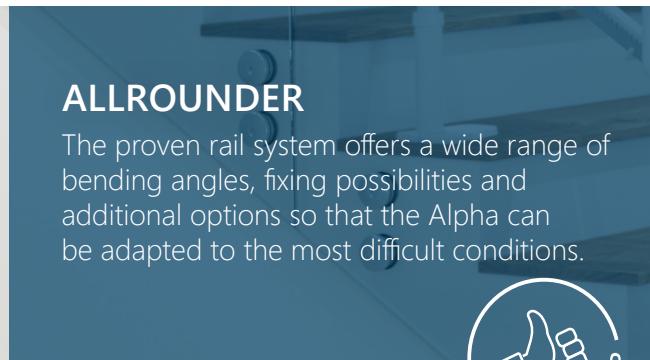

Supports screwed to the wall

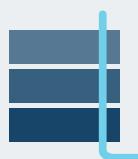

RAIL GUIDANCE

Numerous options for start, stop and curve bends

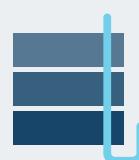

Straight start/stop

As standard, the rails are planned so that the lift leaves the parking position straight ahead

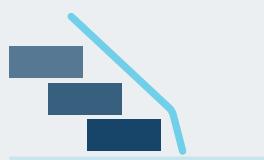

90 degree start/stop

Parking around the corner is a popular option to save space in the hallway and on the stairs

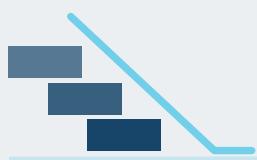

180 degree start/stop

If conditions permit, the stairlift can be parked next to the stairs or behind a wall

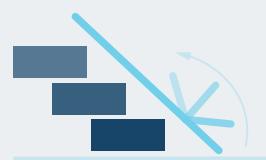

Steep start

Extra-compact rail design at the start reduces the space required of the lift in the hallway

Horizontal overrun

To minimise the space taken up on the stairs, parking the drive unit on a horizontal end piece is recommended

Folding rail

The automatically folding rail at the start serves as a solution for doors or very narrow passages

PREMIUM LINE

Especially special

TWO WOOD TONES

Seat and backrest are available in 2 different wood colour tones

ARTIFICIAL VELOURS LEATHER

6 individual fabrics from velours leather can be chosen for the seat and backrest upholstery

ARMRESTS

Broad armrests made of durable plastic without attachment parts on the top
